Select starting point

Buses must enter the stadium and park on the homeside from Fm Road 933.

Equipment Trailers must enter parking areas from HCR 1240. After performing and reloading their equipment, equipment trucks must repark outside of the tennis courts in the area noted as “Equipment REParking”

Adjacent to the equipment parking areas is a corresponding warm up area. Bands should refrain from making sound in the parking areas. Students should only make sounds during their designated warm up times.

Warm up area is close to a bathroom for student’s use prior to performance. Do not go inside the schools to use the restroom.

After Warmup on the Baseball Field, Bands will then proceed to the SouthEast Corner of the stadium and enter the field which is the visitor’s side, side 2.

They may proceed up until the goal line on the same side of the stadium. Front Ensembles/Large equipment may be rolled quietly to the home side, side 2.

There is NO POWER on the field level of the stadium, but we will have a small yamaha generator (2000 Watts) that can power front ensembles. If you have larger or questionable power needs, email the contest host.

Bands are may use their full 6 minute setup time during prelims and then begin their performance.

Exiting bands will exit through the same gate they come in (Southeast Corner, **orange arrows**)

There is a water station en route between warm up and the stadium.
